

# DATA +

SHIFTING FROM LACK OF INFORMATION  
TO DATA DRIVEN DECISIONS

## BENEFITS:

### TIME

Speeding up your process replacing manual sampling

### PRODUCTION

Giving immediate response to production downfalls and quality deviations

### COST

Showing real time profit assessment of input and output batches

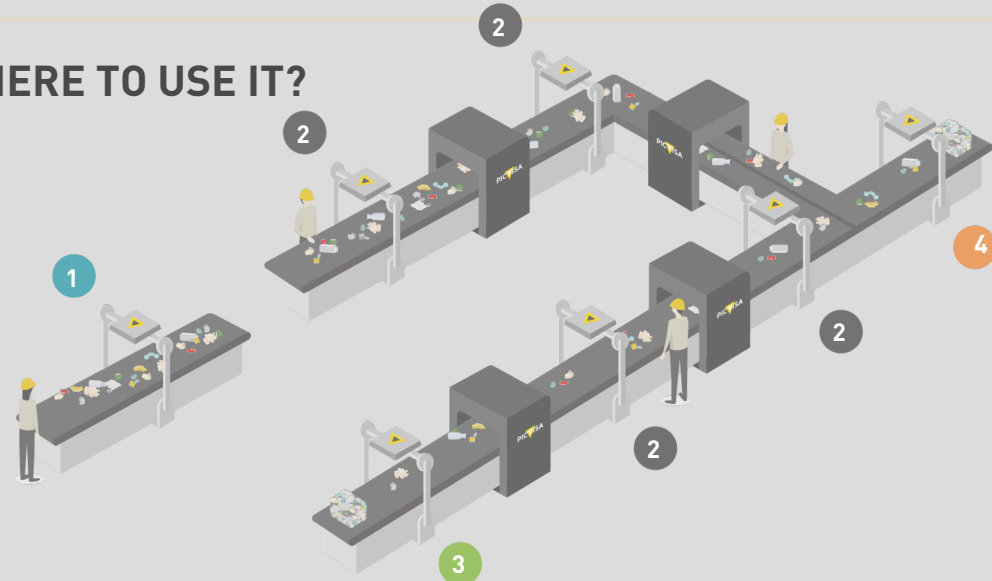

## Contact

**Silvia Gregorini**

## WHERE TO USE IT?

1

### Plant entrance

Determines composition and economic value of the purchased waste bales

3

### Plant exit

Controls exit material quality and Technical Specifications of Recovered Materials

2

### Process efficiency control

Verifies the efficiency of your recovery process

4

### Purity of rejection bales

Measures percentage of non-recycled recoverable material and its impact on landfill rates
